

NOTICE TO CITY OF BURLINGTON WATER CUSTOMERS
Lead and Copper Home Plumbing Survey

Your help is needed for City of Burlington Water Department to comply with new Kansas Department of Health & Environment and Environmental Protection Agency requirements for lead and copper monitoring of our water.

So we can complete a required report, we need the survey completed by each of our customers and returned to us by Friday May 5th, 2017. We realize this is short notice, however, we are under a time constraint to get the data, prepare the report, and submit it to KDHE.

We understand you may not be able to answer all the questions, but please do your best and be sure to submit the survey to us by May 5th. Any information you can provide will be helpful and appreciated. Please return the completed survey to Burlington City Hall by your choice of the following methods on or before May 5th: 1) in person; 2) by mail to City of Burlington, P.O. Box 207, Burlington, Ks 66839; or 3) by email to dhawkins@burlingtonkansas.gov. (It can also be faxed to: 620-364-2996.)
